

How AG360 compares.

Most farm tools do one job well. AG360 runs the whole farm — same picture, side by side.

The AG360 edge

The whole farm, once

Agronomy, grain, equipment, labour and full accounting in one platform — the farmer stops being the middleware.

Lily — talk to your farm

Hands-free voice with live captions over your real bins, contracts and books. Ask; she answers, shows the card, and can book it.

Grain truth to the kilogram

Scale tickets, dockage, settlements and month-end closes reconcile farm-side — receipts in hand when the elevator disagrees.

Built for the prairies

GST done right, hail alerts from Environment Canada, and every punch and ticket survives a dead zone.
